

**THE PS50B-TB. HAND CASE FILL STATION  
& TAPE CLOSING MACHINE.**

This is an extremely versatile unit for anyone wishing to improve their efficiency or to simply make life easier. The operator closes the inner base flaps and places the case into the loading station and fills it. He/she then closes the top inner flaps and at the touch of a button, sends the case into the tape closers. The machine closes and tapes the outer flaps automatically. Job done! Adjustment between sizes is by simple hand wheel.

**Case sizes: L200 x 150 x 120h minimum**

**L600 x 500 x 500h maximum**
