HM 11 AUTOMATIC CASE CLOSER - HOT SEALER FOR VARIOUS SIZE CASES

A machine capable of sealing both top and bottom of a variety of cases. The difference is that the application of the sealant is hot melt glue, not traditional tape. Variable case dimension requirements are easily adapted by use of easy-to-operate hand wheel adjusters.

The machine's PLC is very flexible, and allows storage of up to 12 programs, allowing faster changeovers between carton sizes. The hot melt unit stands alone from the main closer. This ensures optimum line position and machine cleanliness.

Size range:

L200x150x150h minimum
L600x500x500h maximum

Speed:

Up to 15 cases per minute
